

**NO NOISE, NO WEAR = SAVINGS FOR YOU**

**No moving parts in the freezing system of the Servel Gas Refrigerator to wear out, get noisy and need repair**

**Servel** gives you all the advantages of modern refrigeration.

PLUS: (1) Silent operation—from a tiny gas flame which freezes quietly; replaces the motor-compressor unit in other refrigerators, which get noisy as these moving parts wear out.

(2) Economy of the jet freeze system—Servel's freezing system has no moving parts to wear out, get noisy and need repair.

The new Servel GAS Refrigerator "lasts longer" in design, too. It's a masterpiece of streamlined efficiency—as modern 20 years from now as it is today. See the Servel before you buy. Remember: It Stays Silent, Lasts Longer...
